Project Evaluation Sheet			
[Restaurant Reservation System] By **[1B Zero 1]**			
	%		
A. **Report**	**10**		**Remark**
Project Planning Report			
i. Problem Statements and Objectives		/ 1	
ii. List of functions and ADT Specification		/ 3	Draft
iii. Tasks distribution table and Gannt chart		/ 1	
Final Report			
i. Introduction / Conclusion		/ 1	
ii. ADT Specification		/ 1	Final
iii. Implementation Details - Justification for each data structure chosen, e.g., why do you consider the stack data structure, but not queue? - Justification for each algorithm chosen, e.g., why do you implement binary search, rather than other searching algorithms?		/ 3	
B. **Program Source Code**	**22**		
i. Basic functionalities, including add, edit, delete, search, sort, display – No compilation/run-time errors – File handling, usability, user friendliness		/ 12	
ii. Data Structures & algorithms – Any two data structures learned in TDS2111, including linked-list, stack, queue, hash tables, etc. – Array implementation is acceptable, but there will be no mark given in this section. – At least one sorting/searching algorithm learned in TDS2111		/ 5	
iii. Good Programming Practices – Code readability and cleanliness, consistent indentation – Commendation and documentation – Self-explanatory naming convention for variables and function names		/ 2	
iv. Extras – Self-defined header files, separate files for classes, exception handling, aesthetic design – Additional functionalities, etc.		/ 3	

C. **Program Demonstration**	**8**		
i. System demo video		/ 3	
ii. Presentation material and skills		/ 4	
iii. Question and Answer handling skills		/ 1	
Total		**/ 40**
